ABOUT ANEWK

Senior engineering capacity for organisations that cannot afford to get it wrong.

ANEWK (Pty) Ltd is a Johannesburg technology consultancy, incorporated in February 2026 and founded by Kwená Mokgohlwa, a senior full-stack engineer and solutions architect with more than seven years in banking, fintech and mining.

We help public entities and regulated organisations build digital platforms, protect them, and respond when something goes wrong. Every engagement is scoped in a written statement of work, delivered by senior people, and documented so the findings hold up in front of auditors, regulators, boards and disciplinary forums.

In 2026 we completed a cyber incident response and digital forensics engagement for a South African public water board. We bring that same evidence-led discipline to platform builds, security assurance, AI readiness and brand work.

AT A GLANCE

Registered name
ANEWK (Pty) Ltd

Registration number
2026/091143/07

CSD supplier number
MAAA1748250

B-BBEE status
Level 1, 135% recognition (EME)

Ownership
100% Black, 100% Black youth

Head office
**1 Sandberg Street, Denver,
Johannesburg, 2094**

Service area
**National: on-site in Gauteng and
surrounds, remote anywhere**

Why public entities work with us

Full preferential procurement value

Level 1 B-BBEE EME with 135% recognition, 100% Black-owned and 100% Black youth-owned. Supports the specified goals in your preferential procurement policy.

Proven in the public sector

A completed incident response and forensics engagement for a public water board, delivered in ten working days under a signed SLA.

Senior-led, single point of accountability

The founder scopes the work and signs every deliverable. Partners work under our architecture, standards and review.

Priced for public budgets

Transparent rate cards published in every SOW. Not a VAT vendor, so quoted prices are final.

PROCUREMENT CREDENTIALS

Registered, tax compliant and ready to contract.

Details below match our Central Supplier Database record and supporting certificates. Copies of every document listed are available on request.

Level 1

B-BBEE CONTRIBUTOR**135% procurement recognition · Exempted Micro Enterprise**

CIPC-issued EME certificate (affidavit in terms of the Amended Codes of Good Practice, 2013). Certificate 9451712966, issued 31 January 2026, valid to 30 January 2027.

COMPANY · CIPC

- B-BBEE EME certificate
- SARS notice of registration and tax compliance PIN
- Completed SBD 1, SBD 4 and SBD 6.1 forms
- Certificates of key personnel

WHAT WE DO

Four practices, one standard of delivery.

PILLAR 1 · LEAD PRACTICE Solutions Architecture and Platform Development

Cloud platforms on AWS, from first prototype to a managed production build.

- Solution architecture and cloud migration planning
- Web and mobile platforms, citizen and staff portals
- Fixed-price working prototypes in weeks
- Systems integration and APIs
- Managed builds and architecture retainers

PILLAR 2 · PUBLIC-SECTOR PROVEN Security Research and Risk Management (DevSecOps)

Investigate incidents and keep systems provably secure.

- Cyber incident response and containment
- Digital forensics: email, endpoint and cloud accounts
- Vulnerability assessment and penetration testing, with an accredited partner
- Security assurance retainers
- Cloud and application security reviews

PILLAR 3 · EMERGING Autonomous Intelligent Machines and Systems (DevMLOps)

Practical, governed use of AI and automation.

- AI and automation readiness assessments
- Agentic workflow design for internal processes
- Data and machine-learning pipeline advisory
- AI security and governance reviews

SUPPORTING PRACTICE Brand, Print and Livery

Identity, print and branded material, through vetted production partners.

- Corporate identity and design systems
- Printed collateral: reports, brochures, stationery
- Signage and vehicle livery
- Branded merchandise and event material
- Websites and digital assets

Across every practice

Built on AWS where hosting is involved. Scoped in a written SOW with a published rate card. Findings and deliverables documented to stand up to audit.

EXPERIENCE

Track record

Case study · South African public water board

2026 · COMPLETED

THE PROBLEM

A targeted phishing attempt using domain impersonation reached senior staff. In parallel, external messages made allegations against a senior official.

WHAT WE DID

Two workstreams in ten working days: incident response with endpoint forensics, and a forensic investigation of the external communications. Evidence was captured in a write-blocked environment with a SHA-256 hash-chained chain of custody.

THE OUTCOME

A forensic report fit for disciplinary, regulatory or legal use. No persistent mailbox compromise or confirmed data exfiltration was found in the accounts examined.

ISO/IEC 27037

ISO/IEC 27042

NIST SP 800-61

ACPO principles

POPIA

Founder's experience in regulated environments

Absa Group

Lead Product Engineer on core banking and product systems.

Standard Bank

Cloud and data engineering.

Glencore Umoja programme

Co-architected the asset management and anti-fraud component, delivered with Standard Bank and Vodacom to more than 6,000 users.

Wyzetalk

Independent contract building with agentic development workflows.

How an engagement runs

1

Scope

Written SOW, fixed price or capped hours, published rates.

2

Authorise

Signed SLA and access authorisation before any system is touched.

3

Deliver

Senior-led work, regular status updates, evidence kept as we go.

4

Hand over

Signed report or system, documentation and a close-out briefing.

LEADERSHIP

Who you work with

Kwena Motsumi Mokgohlwa

FOUNDER, DIRECTOR AND TECHNOLOGY CONSULTANT

Senior full-stack engineer and solutions architect with more than seven years in banking, fintech and mining. Kwena scopes every engagement, leads delivery and signs every deliverable.

- IBM Cybersecurity Analyst Professional Certificate, incl. incident response and forensics
- HackBio: AI for Genomics, and Building AI Agents for Biology
- Reading for a BSc in Mathematics and Economics, University of London
- In progress: AWS Solutions Architect – Associate

Delivery network

ANEWK scales to the size of each contract through vetted partners who work under our architecture, standards and review. ANEWK remains the single contracting party and point of accountability.

Development partners

Developers and studios for managed builds, with code review by ANEWK.

Security testing partner

Accredited penetration testers, working to ANEWK's scope and reporting.

Production partners

Print, signage and livery producers for brand work.

REQUEST A QUOTATION

Send us your RFQ or terms of reference.

We respond to RFQs with a scoped quotation and the full compliance pack.
